Tissue-Tek® Cryo₃® Flex Cryostat

“ The Cryo₃® Flex 3D precision chuck allows me to maximize the number of tissue sections per block and the Anti-Roll Rake prevents folding and wrinkles to preserve tissue quality. The ability to manipulate the tissue with such precision makes a world of difference when working with small tissues such as ours. Plus, the chuck retains its position when locked/unlocked, saving operator time and ensuring section consistency. ”

Alan Cheng, MD - Associate Professor of Otololaryngology-Head and Neck Surgery, Stanford School of Medicine

Try It Before You Buy It!

Once you have tried the latest 3rd generation features, we are confident you will want to keep the Tissue-Tek® Cryo₃® Flex Cryostat.

A brand new cryostat will be sent for demonstration purposes. Keep that installed instrument and receive a 25% discount. A Conditional Purchase Order (CPO) is required prior to shipping the unit.
